Analogue Instruments

a vital part of your world

ENERGY DIVISION

Analogue Instruments

High quality analogue instruments designed to measure an extensive range of electrical and electronic parameters. This comprehensive range offers DIN instruments, ANSI switchboard meters, panel indicators, sealed and ruggedised instruments, and complementary selector switches for line-to-line and line-to-neutral readings. Instruments are precision engineered and robust in design, ensuring accurate measurement and display in the most demanding of environments. All instruments are available in a range of styles, sizes and specifications to meet the exacting needs of your industry.

Contents

DIN Panel Meters

An extensive range of 48, 72, 96 and 144mm DIN style panel meters. Short-scale ammeters, voltmeters and frequency meters incorporate slide-in dials and terminal covers. Long-scale meters are also available. Meters for power or energy contain in-built transducers and can be customised to suit many different system configurations and ranges.

Page

2 – 29

Instrument Selector Switches

Panel mounted selector switches offering a 7-position voltmeter switch and a 4-position ammeter switch for reading line-to-line or line-to-neutral voltage and phase current.

30 – 31

070 Series ANSI Switchboard Meters

An extensive range of analogue and digital/analogue meters in 4½" and 8½" ANSI case styles. Meters utilise a high shock oil damped movement, and provide 1% accuracy for all RMS AC and DC ranges. The range offers various customised options and features. UL, CSA, ABS and ISSeP approvals.

32 – 62

549 Series Panel Meters

Compact panel meters designed to fit standard 1½" switch knock-outs. The range offers high accuracy AC and DC ammeters and voltmeters, elapsed time meters and impulse counters. ABS approvals.

63 – 65

Saxon Series Panel Indicators

A range of 2½", 3½" and 4½" surface mount panel meters utilising taut band mechanisms and offering IP54 protection. The range offers iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters. UL approvals.

66 – 67

016 Series Fiesta Panel Indicators

A robust range of short-scale and long-scale 3½" surface mount panel meters offering IP55 protection and featuring wide view-contoured windows. The range offers iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters. UL approvals.

68 – 70

Challenger Series

Challenger analogue panel meters feature a detachable lower fascia plate, which allows either surface or window mounting. Meters use a high torque pivot and jewel movement.

71 – 75

078/080/087 Series Sealed and Ruggedised Indicators

Designed to comply with industrial, marine and military specifications, these 240° and 90° scale meters are resistant to extreme shock, vibration, temperature, dirt and humidity. The range offers a wide range of bezel sizes fitted with toughened glass.

Guide to Catalogue Numbering Systems and Glossary

81 – 82

Features

Extensive range
Accurate measurement and display of electrical and electronic parameters
Wide range of case styles and specifications
Maximum reliability in harsh environments

Benefits

Low cost
Local indication
Ease of installation
Minimal training
Low maintenance
Reasonable accuracy

Applications

Switchgear
Distribution systems
Generator sets
Control panels
Energy management
Building management
Utility power monitoring
Process control
Motor control

Approvals

UL, CSA, ABS, LRS, BV, ISSeP

Features

A range of the most popular short-scale measuring instruments in 4 case sizes
Shock resistant sprung pivot and jewel movement
Terminal covers supplied as standard
EMC hard frequency meter are fully EMC and LVD compliant
 $\frac{1}{4}$ " 'fast on' terminals available

Benefits

Low cost
Local indication
Ease of installation
Minimal training
Low maintenance
Customised options and features

Applications

Switchgear
Distribution systems
Generator sets
Control panels
Energy management
Building management
Utility power monitoring
Process control
Motor control

03/00057 - Frequency meters

DIN Panel Meters – Short scale

A range of 48, 72, 96 and 144mm DIN style panel meters measuring all electrical parameters and featuring moving coil or moving iron movements. All meters incorporate slide-in dials and terminal covers as standard. A range of customised options is available.

Movements

Moving Coil Meter

Centre cored, self shielding moving coil movement, using pivots, hairsprings and sprung jewels. Seven variations have been designed in movement ranges: all intermediate ranges are achieved by shunting the next lowest range. All DC voltmeters are 1000 ohms per volt, rectified product run at 900 ohms per volt, millivolt meters use the 5 milliamp movement.

Moving Iron Meter

Clapper type repulsion design using pivots, hairsprings and jewel movements. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. All voltmeters are manufactured with external voltage dropper resistors to substantially reduce the self heating effects.

Frequency Meter

Meter uses a 100 microamp 4000 ohm movement driven by an EMC hard frequency conversion circuit.

Dials, Scales and Pointers

Standard dials are white matte with black printed scales and bar knife-edge pointers. Black dials with white or yellow scales and pointers are also available. Interchangeable slide-in dials are used on the E242, E243, E244 and 246 90° moving iron, moving coil and frequency meter models.

General options include red supplementary pointers, red indexes (quadrant scales), red, green or blue lines, bands or segments, finely spaced divisions, multi-scales, special scales and captions to customer's requirements.

General Specifications

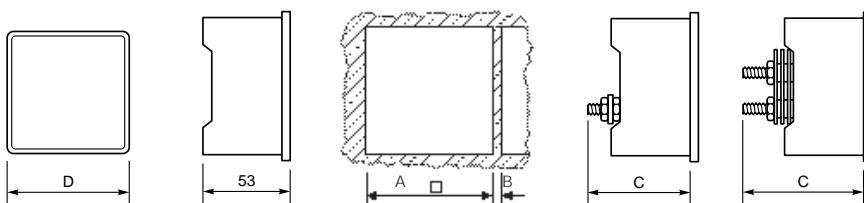

Performance	BSEN60051
Measuring ranges	DIN 43701
Accuracy overload	BSEN60051
Dimensions	DIN43700
Scale marking generally to	DIN43802
Magnetic influence	BSEN60051
Safety	BSEN61010-1
Terminals	Clamp strap M4 for up to 25A. Clamp strap M8 for over 25A. 1/4" spade terminals available for models E243 and E244
Humidity range	Up to 95% RH (non condensing)
Test voltage @50Hz	3kV RMS for 1 minute
Ammeter ranges	1.0/1.2/1.3/1.5/2.5/4/5/6/8 and decade multiples thereof.
Overload AC current	x 1.2 continuous x 10 for 5 seconds
AC voltage and frequency	x 1.2 continuous x 2 for 5 seconds
Standard calibration	23°C. Calibration at other temperatures available on request
Operating temperature	-20°C to +60°C
Damping time	Less than 3 seconds
Enclosure code	IP52 as standard IP54 on request
Case and base	Grade UL94V0 (Lexan 500R)
Case	Dimensions and panel cutout conform to IEC473, DIN 43700. Case made from glass filled polycarbonate self-extinguishing and non drip in accordance with UL94 V-O.
Bezel	Slim-line DIN43802, black as standard
Bezel window	Standard sheet glass, with zero adjusters where appropriate. Non reflecting glass or polycarbonate shatterproof windows are available.
Installation	Installations in switchboard panel or mosaic arrangement on equipment or machine with a panel thickness of up to 40mm in a horizontal or vertical plane
Fixing on panel	Swivel captive fasteners, which can be fixed at either corner.
Mounting position	Normal vertical mounting or as indicated on the scale in accordance with DIN 16257. A deviation of ±15° is permissible
Insulation group	Insulation resistance more than 5MΩ@ 500 V
Environmental	Measurement category III IEC 1010-1 Pollution degree 2 IEC 1010-1 Electrical rating 600V RMS (920V peak)
Approvals	EMC, LVD and Lloyds

Required orientation must always be stated when ordering if other than vertical mounting is required.

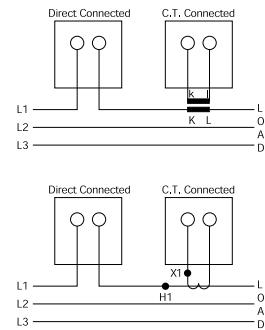

DIN Panel Meters – Short scale

Moving Iron AC Ammeters and Voltmeters

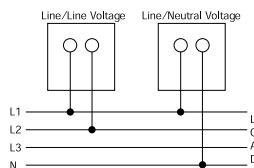

Designed to measure AC current or voltage, these meters indicate true RMS values and are substantially independent of system waveform. Scales are calibrated down to 20%, and ammeters can have overload scales of $x2$, $x3$, $x5$ or $x6$ for motor start duty. Ammeters can be supplied for use with $-/1A$ or $-/5A$ current transformers, whilst voltmeters can be scaled for use with voltage transformers. Heavy damping is available as an option. Meters can be used to measure DC at reduced accuracy.

Maximum Demand Indicators

The thermal/time characteristics of MDI meters monitor the most economic use of cable, fusegear and transformers. The directly heated bimetal element indicates mean RMS current over 8, 15, or 20 minutes, and a red slave pointer shows the highest value reached. The reset knob is wire sealable. Scales are calibrated to match the CT primary plus 20% overload. End values are selected from: 1.2, 1.8, 2.4, 3, 3.6, 4.8, 6, 7.2, 9 amps and their multiples of 10 and 100.

Specifications

Accuracy:	Class 3
Options:	5A for use with separate CT 5/5A saturating CT 1/5A saturating CT
Burden at 50 Hz:	MDI - 2.5VA, CT - 2VA
Overload withstand:	Standard: 5 x FL for 5 seconds, 10 x FL for 1 second. With saturating CT: 10 x FL for 3 seconds, 20 x FL for 1 second

DIN Panel Meters – Long-Scale

An extensive range of 48, 72, 96 and 144mm DIN style panel meters measuring all electrical and electronic parameters. Meters are shock resistant and vibration proof and supplied with terminal covers. A selection of slide-in dials and customised options are available.

Features

Extensive range of specialist meters in four case sizes
Shock resistant taut band suspension
Vibration-proof Hi-Q damping
Slide-in dials for 90° current, voltage and frequency on models 242, 243 and 244
Terminal covers supplied as standard

Benefits

LRS and BV

Movements

In Crompton Instruments' patented 'Hi-Q' taut band suspension, all the delicate parts of the traditional instruments are eliminated. There are no pivots, no jewel bearings, no hair-springs and no air damping vane. Instead, a tough platinum ribbon suspends the moving element between front and rear tension springs. Specially contoured pads are fitted to the ends of the spindle, and the working gap at each end is filled with a high quality silicon fluid. The pads, together with the fluid reservoir, form a system which acts as a resilient built-in shock absorber. This provides both rotational and longitudinal damping as the moving element floats on oil with no bearing friction and is effectively cushioned against shock and vibration. 360° synchroscopes and power factor meters have robust pivot and jewel bearings with oil damping.

Dials, Scales and Pointers

Standard dials are white matte with black printed scales and bar knife-edge pointers. Black dials with white or yellow scales and pointers are also available. Interchangeable slide-in dials are used on model numbers 242, 243 and 244 90° moving iron, moving coil and frequency meters. General options include red supplementary pointers, red indexes (quadrant scales), red, green or blue lines, bands or segments, finely spaced divisions, multi-scales, special scales and captions to customer's requirements.

Illumination

Meters come with a full range of illumination options. Internal illumination is available in the following models:

- 244 and 246 short-scale moving coil and moving iron vane.
- 243, 244 and 246 long-scale moving coil and moving iron vane.

Through-dial (translucent) illumination on 244 and 246 models. Edge illumination on 243, 244 and 246 models. Replaceable 6, 12 or 24V lamps are used on all models except 243 long-scale meters, where the lamps are internal.

Specifications

Dual AC Ammeter Direct Connected

Dual AC Voltmeter

DIN Panel Meters – Long-Scale and Dual

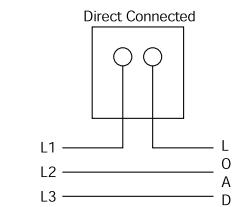

Moving Coil Rectified AC Ammeters and Voltmeters

For high frequency or linear full scale AC measurements, these instruments measure average values of sinusoidal waveforms and are scaled in RMS values.

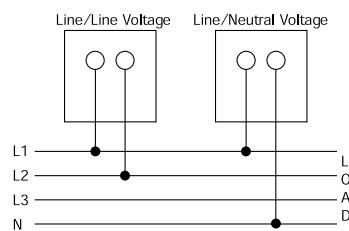

The high quality silicon bridge rectifier gives a linear scale down to near zero, where some compression occurs.

Connections

DIN Panel Meters

Moving Iron AC Ammeters and Voltmeters with Selector Switch

Crompton Instruments, a business unit of Tyco Electronics, is pleased to add the new moving iron AC ammeter and voltmeter with selector switch to its comprehensive range of panel meters. These 96mm and 72mm units offer Class 1.5 true RMS measurement of three-phase AC voltage or current with various switch notation options. The integral selector switch eliminates the necessity for a separate selector switch, saving valuable panel space and providing installation benefits. Both ammeters and voltmeters feature a slide-in dial, scaled for VT or CT values to suit application primary values.

These robust moving iron meters incorporate a clapper type repulsion design which utilises a pivot, hairspring and jewel movement. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. Voltmeters are manufactured with internal voltage dropper resistors.

Product Codes – Options

Description
Non reflecting glass window
Polycarbonate shatterproof window
Red supplementary pointer, externally adjustable
Red index mark (triangle)

Please state any required options at time of ordering.

Features

- Integral selector switch
- True RMS measurement
- Slide-in dials
- Scaled for customer VT or CT primary values
- DIN 72 and DIN 96 models
- Terminal cover as standard
- Shock resistant sprung pivot and jewel movement
- x2 overload ammeters

Benefits

- Space and time saving
- Competitive cost
- Local indication
- Ease of installation
- Low maintenance
- Customised options and features

Applications

- Switchgear
- Distribution systems
- Generator Sets
- Control panels
- Energy management
- Building management

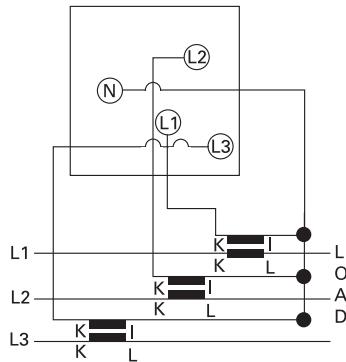

Compliant with

IEC61010-1B2001, EMC and LVD

DIN Panel Meters – ETM and Impulse Counters

Elapsed Time or Hours Run Meters

Elapsed time meters (ETM) or hours-run meters monitor "ON/RUN" time of plant and equipment, allowing the user to effectively control production efficiency, cost estimation and service period monitoring for preventative maintenance. Time is measured in increments of 0.01h up to 99999.99 hours after which the meter automatically resets to zero. Meters are non resettable before this time to prevent accidental resetting.

Specifications

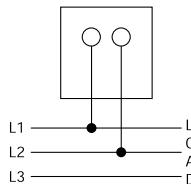

Display:	99999.99
Voltage:	100-125V AC 200-250V AC 380-440V AC
Frequency:	50 or 60Hz
Burden:	2.5VA for DC input models

Impulse Counters

Impulse counters can be used to measure any parameter where there is an applicable pulse that is directly proportional to the measured parameter. For example, the number of motor starts can be recorded by using a combination of Paladin transducers, kWh, ampere hour, VA hour. The counter registers one digit every time an on/off voltage pulse is applied to the input terminals, and is non resettable to prevent accidental resetting.

Specifications

Accuracy:	Pulse for pulse
Display:	6 digit 999999

DIN Panel Meters – Quadra

Quadra 3-in-1 and 4-in-1

The Quadra range of 96mm² DIN style 3-in-1 and 4-in-1 meters offer reduced stock holding and savings on space, installation and commissioning. Ideally suited for generator set applications, the range offers measurement of AC and DC, current and voltage, frequency or elapsed time. Options include customer logo on dial, coloured dial, panel mounting gasket and heavily dampened movements.

Specifications

Voltmeter:	110, 120, 200, 230, 240, 380, 400, 415, 440, 480V AC nominal. Maximum end scale 600 volts
Frequency meter inputs:	45/55Hz, 55/65Hz, 45/65Hz, 360/440Hz Voltage inputs: Same as voltmeter inputs above
Ammeter inputs:	10mA AC 1 or 5A input (internal CT)
Hours run:	110, 120, 220, 230, 240, 380, 400, 415, 440 volts 50 or 60Hz
Hour run counting range:	99999.99 hours
DC current:	250µA - 1A DC including 1, 5, 10, 20 and 4-20mA DC for transducer inputs
DC volts:	50mV to 600V DC including 50, 60, 75 and 150mV for shunt inputs
Burden:	Current: 0.75VA per phase Hours run: 2.5VA LCD hours run: 0.5VA Voltage: 0.5VA Frequency: 4VA

When ordering please specify the inputs for each parameter and the scaling required.

DIN Panel Meters – Temperature and Process Indicators

Temperature Indicators

Long-scale indicators are used to read temperature values, usually remotely with RTD or thermocouple sensors supplied by the customer. RTD (Resistance Temperature Detector) indicators measure the change in the sensor resistance. A 2- or 3-wire system may be used. Thermocouple indicators accept standard millivolt input signals. Cold junction compensation is provided and thermocouple break indication is incorporated into the instrument.

Specifications

Accuracy:	Class 1.5 - indicator only. RTD indicator suitable for 10Ω copper 100Ω platinum, 100 and 120Ω nickel sensors. Power in RTD is around 100µW. Thermocouple indicator suitable for J (0-700°C), K (0-1200°C). 50Ω maximum circuit resistance.
Auxiliary supply:	Model 45R: from 63.5-480V AC at 50/60Hz. Model 45T: 110, 115, 220, 240, 380, 400, 480V AC and 12, 24, 48, 110, 125V DC.

Tap position indicator with self-contained power source

DIN Panel Meters – Tap Position and Phase Sequence

Moving Coil Tap Position Indicators

Long-scale position indicators are used to monitor transformer tap, hoist or valve positions. They employ a 3-wire system and 11 to 18 positions can be provided using 400u steps. The measuring system is made up of a moving coil indicator, stabilised power supply and transducer. Indicators can accept user-supplied remote potentiometer or resistance thermometer sensors.

Specifications

Accuracy:	Class 1.5
Auxiliary supply:	AC 50, 110, 220, 240V, 50/60Hz DC 50, 110, 125, 220V, ±15%

3-phase 3- or 4-wire, unbalanced load

3-phase 3- or 4-wire 3-voltage, balanced load

3-phase 3-wire using two CTs, unbalanced load

DIN Panel Meters – Synchscope

360° Dynamometer Synchroscope

Where manual parallelling of two AC systems is necessary, the frequency of both systems can be monitored by a synchroscope. The systems are synchronised when the pointer is stationary in the 12 o'clock position. The instrument uses silicon oil damping and is rated for continuous operation and connection.

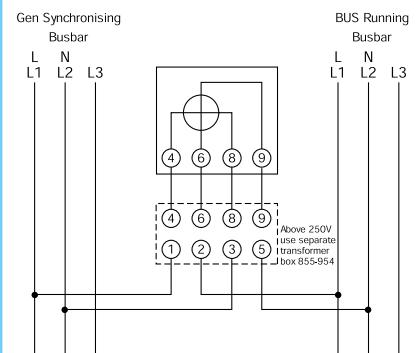

Specifications

Accuracy:	Class 2.5 (2° electrical)
Ratings voltage:	100-125V, 200-250V, 380-450V* * Use transformer box 855-954 100-110V for VT use
Frequency:	50Hz, 60Hz, 50/60Hz, 400Hz
Burden at 50Hz:	5VA maximum.

360° LED Synchroscope

360° LED Synchroscope and Synchro Check Relay

DIN Panel Meters – LED Synchroscope

360° LED Synchroscope and Synchro Check Relay

Where manual parallelling of two AC systems is desired, the frequency of both systems can be monitored by an LED synchroscope. The systems are synchronised when the green LED is lit in the 12 o'clock position. The instrument is rated for continuous operation and connection. For the semi-automatic parallelling of two AC systems, the voltage, phase displacement and the frequency of both systems can be monitored by this LED synchroscope and synchro check relay. Controls for voltage, phase angle, and time delay are provided. The systems are synchronised when the green triangular LEDs are lit together with the GEN/BUS green LEDs. A dead bus option is also available.

Specifications

Ratings voltage:	63.5, 110, 120, 220, 230, 240, 380, 400, 415, 440, 480V 110/120V (115V nominal) 220/240V (230V nominal) 380/480V (430V nominal) Volts AC or via VT
Frequency:	40/65Hz
Burden at 50Hz:	4VA maximum Suitable for single or three phase systems
Safety:	IEC1010-1 (300V AC RMS installation degree 2)
Dielectric:	4kV rms for 1 minute
Isolation:	BUS/GEN/RELAY
Vibration:	To Lloyds shipping specification
*Phase difference:	+0-20°, +/-1°
*Voltage difference:	+0-20%, +/-2% 0-10% for models G and H
*Time delay:	0-2.5 seconds +10%
*Accuracy:	Synchronisation at T.DC is +1°

*Only for the 360° LED synchroscope and synchro check relay.

For the 244-14L and 244-14D models, the generator voltage is compared to the nominal input (bus) voltage specified at time of ordering. For the 244-14G and 244-14H models, the generator voltage is compared to the measured bus voltage.

DIN Panel Meters – Power

Wattmeters and VArmeters

The 244/246 models are self contained and able to measure active and reactive power in both balanced and unbalanced, single and 3-phase 3- or 4-wire systems. Wattmeters are ideal for clear precise analogue indication of power in applications such as power generation, industrial control panels and power distribution.

Specifications

Accuracy:	Short-scale: Class 2.5 Long-scale: Class 1.5
Measuring ranges:	Voltage: 94-106% Current: 0-120%
Frequency influence:	0.4%Hz
Rating:	Current: 0.2-5A, direct connected 1A-5A for CTs. Voltages: 57.7-480V

Instrument Selector Switches

Panel mounted selector switches offer a 7-position voltmeter switch and a 4-position ammeter switch for reading line-to-line or line-to-neutral voltage and phase current. Each switch can be supplied with either numbered or coloured annotation.

Specifications

Loading capacity:	SO1 and SO2: 20A, 500V. SO3: 12A/480V
Switching capacity:	3kW at 220V, 5kW at 380V, 5.5kW at 500V
Isolating voltage:	SO1 and SO2: 500V AC. SO3: 480V AC
Operating temperature:	-20°C to +70°C
Mounting installation:	Two point front fixing
Dimensions:	48mm x 48mm
Panel cut out:	3 drilled holes
Compliant with:	LVD and EMC
IP protection:	SO1 and SO2: IP65. SO3: IP54

070 Series ANSI Switchboard Meters

High quality range of switchboard instruments with Class 1 accuracy and which complies with American ANSI-C39.1 (1981) specifications. Available in 4½" and 8¾" case sizes, their rugged design characteristics meet the needs of the most demanding environmental applications. This extensive range of analogue and digital/analogue meters utilises high shock oil damped movements and provides 1% accuracy for all RMS AC and DC ranges. The range offers various customised options and features.

Features

Rugged Hi-Q taut band suspension
Class 1 accuracy
JIS dimensioned product available on request

Benefits

Meets all the requirements of ANSI-C39.1 (1981)
Parallax error-free platform dials
Bump, shock and vibration proof
Customised options and features

Applications

Switchgear
Distribution systems
Generator sets
Control panels
Energy management
Building management
Utility power monitoring
Process control
Motor control

Approvals

UL approved file no. E203000
ABS (American Bureau of Shipping)
93-LD 17806-X

Description

070 series offers two case sizes, 4½" (Models 075, 077 and 078) and 8¾" (Model 079). Model 078 is high shock hermetically sealed and all models have heavy gauge pressed steel cases. Mounting is by four integral studs.

Models 075 and 077 are a one piece flame retardant polycarbonate moulding with a black matte finished bezel area, and a specially contoured window to minimise reflection from adjacent light sources. Model 079 has a black pressed steel bezel with a toughened glass window, and Model 078 has a die-cast bezel and a projecting moulded toughened glass window, which incorporates a gas tight zero adjuster.

Scales are 240° moving iron and 250° moving coil with parallax error-free platform dials. Standard dials are white matte with black printed scales and bar knife-edge pointers. Black dials with white or yellow scales and pointers are also available.

General options include supplementary red pointer (075 and 077), slave pointer, calibration for non standard ambient temperatures, special scales, trim potentiometers, and illuminated dials with white or red light sources.

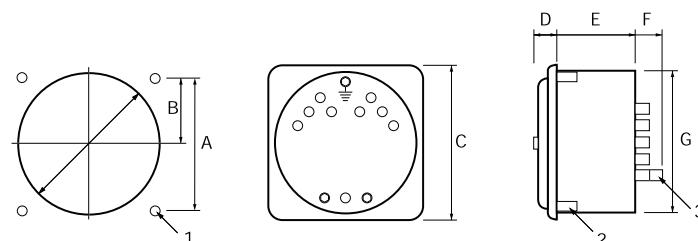

Specifications

Performance:	ANSI C39.1 (1981)
Accuracy:	Class 1
Terminals:	10-32 UNF terminals (M5 screw clamp terminal for Model 075)
Dielectric voltage:	Withstand test 2.3kV for 1 minute
Response time:	Approximately 2.5 seconds to full scale (077 and 078) and 3.5 seconds (079)
Overshoot:	33% maximum
Standard calibration:	23°C
Operating temperature:	0°C to +40°C. Model 078: -40°C to +70°C.
Storage temperature:	-10°C to +50°C
Extreme temp range:	-20°C -to +65°C
Enclosure integrity:	Models 075/077/079 to IP54(NEMA 3S) splash proof, IP55 (NEMA 4) hoseproof is an optional extra Model 078 to IP67 (NEMA 6 and 6P)
Fixing on panel:	4 integral 1/4-28 UNF fixing studs
Approvals:	EMC and LVD, UL and ABS

** 100-440V = (100/125, 200/250, 380/440). Frequencies 45/55, 55/65, 45/65, 47/53, 57/63, 360/440.

*** Using transformer box 855-954

**** Nominal voltage to be specified

For specification and connection diagrams, please refer to equivalent models in 240 Series DIN Panel Meter section.
Replace 244 with 077 etc., e.g. 244-210 becomes 077-210.

AC and DC Ammeters, Voltmeters and Frequency Meters

This range of self contained, Hi-Q, taut band moving coil meters feature 250° linear scale and oil damped mechanisms for superior performance in high vibration situations. AC instruments are available with true RMS converting circuit or RMS compensated rectifier. While types of frequency meters can be damaged by transient supply voltage spike. Crompton 077-41 frequency meters can withstand, without damage, 10 successive transient spikes of 1250 volts. The range offers UL and CSA approvals. JIS dimensioned products are available on request.

Specifications – General

Manufactured in accordance with American National Standards ANSI C39.1, (1981)

Accuracy:	±1% full scale at 23°C (73°F)
Scale arc:	250° full scale deflection
Scale length:	077 and 078: 175.2 mm (6.9") 079: 353 mm (13.9")
Scale plate:	2 piece, platform type
Response time:	077 and 078: Approximately 2.5 seconds to full scale 079: Approximately 3.5 seconds to full scale
Operating temperature:	0 to 40°C (32 to 104°F)
Storage temperature:	-10 to +50°C (14 to 122°F)
Extreme temp range:	-20° to +65°C (-4° to 149°F)
Terminals:	Standard 10-32 UNF stud. M5 screw clamp is optional.
Position:	Vertical (scale)
Dielectric withstand:	2300V AC for 1 minute between electrical circuit and case
Overshoot:	33% maximum
Enclosure code:	077 and 079: IP54, optional IP55 078: IP67
Approvals:	EMC and LVD. UL approved file no. E203000

Specifications – Ammeters and Voltmeters

Overload rating:	AC ammeters - 2 x continuous, 50 x for 1 second AC voltmeters and frequency meters - 1.2 x continuous DC ammeters - 2 x continuous 10 x for 1 second DC voltmeters - 1.2 x continuous
Frequency range:	AC calibration 60Hz ±20%

Specifications – Frequency Meters

Response time:	3 seconds maximum
External temperature influence:	0.6 times accuracy maximum with ±10°C from reference temperature
External field influence:	2.0 times accuracy maximum with 0.5mT field
Acceptable input harmonic content:	Up to 30% distortion

Maximum frequency Hz	Center scale Hz	Error in Hz
45-55	50	0.15
46-54	50	0.15
45-65	55	0.25
50-70	60	0.25
55-65	60	0.15
56-64	60	0.15
58-62	60	0.08
350-450	400	1.30
360-440	400	1.25
380-420	400	0.80

Thermal Maximum Demand Directly Heated Element Type

Meter indicates the maximum average ampere demand of a system. A red resettable slave pointer is driven upscale by the indicating pointer to show maximum average current value since the previous setting. 4 1/2" square flange.

Specifications

Burden:	3.5VA with limiting CT, 2.5VA without limiting CT
Time lag:	15 minutes
Accuracy:	3%, 50 or 60Hz

Product Codes

5/6A with 20% overload and internal limiting CT	CT 077-16EU-LS**
5A - without overload, with internal limiting CT	•077-16EU-LS**- NO

AC Maximum Demand Ammeter

Thermal / Instantaneous Maximum Demand Ammeter (MDA)

Allows instantaneous current values to be read independently of the thermal indicator. This meter combines a thermal movement with a rugged short-scale iron vane indicator.

Specifications

Burden:	4VA with limiting CT, 3VA without limiting CT
Time lag:	15 minutes
Accuracy:	3% MDA, 2% iron vane, 50 or 60Hz

Thermal Instantaneous Maximum Demand Ammeter

Product Codes

Thermal / instantaneous MDA	
5/6A with 20% overload scale and internal limiting CT	•077-16FU-LS**
5A - without 20% overload scale, with internal limiting CT	•077-16FU-LS** - NO
Dual range - thermal instantaneous	
3/6A - with 20% overload scale	•077-16FU-LK**
2.5/5A - without 20% overload scale	•077-16FU-LK** - NO
6/12A with 20% overload scale and internal limiting CT	•077-16FU-LV**
5/10A - without 20% overload scale with internal limiting CT	•077-16FU-LV** - NO

Instantaneous Maximum Demand Ammeter with Slave Pointer

Designed for compatibility with other 4 1/2" switchboard meters, this instrument enhances panel appearance and indicates maximum instantaneous load current values. A long-scale high torque, taut band iron vane movement drives the red slave pointer.

Specifications

Burden:	5VA
Accuracy:	1% 50 or 60Hz

Instantaneous Maximum Demand Ammeter

Product Code

5A - without overload scale	077-08DA-LS**

AC Wattmeters and VArmeters

The Crompton 70 series of AC wattmeters and VArmeters incorporate a DC moving coil taut band indicator with the Crompton designed micro-circuit watt transducer PCB to read power on single or three-phase systems. VArmeters can be supplied with internal or external phase shifter according to user preferences. The most frequently selected wattmeter scale marking for common current and voltage transformers are listed on the following pages. In addition, these instruments may be supplied with zero-left or center-zero scales at the same list price.

Scaling

Wattmeter and VArmeter current circuits should have equal carrying capacity because they are frequently connected in series. This means that the sum of the left and right end-scale values of the VArmeters should be equal to or greater than the full scale value of the wattmeter (or have higher end-scale values if the instruments are center or offset-zero). Instruments measuring 10,000 kilowatts and over are marked in megawatts. Center-zero or offset-zero watt and VArmeters are marked "IN" for left deflection and "OUT" for right deflection. Customised scales may be calculated for wattmeters and VArmeters not listed on the charts. Scales for watts must be one of the standard full-scale dial markings shown in the charts.

Calibration

For full load value of watts or VAr, assuming unity power factor:

1-phase 2-wire watts = amps x volts

3-phase 3-wire watts = amps x line-to-line volts x $\sqrt{3}$

3-phase 4-wire watts = amps x line-to-neutral volts x 3

Minimum scale values are obtained by multiplying resultant watts, using the above formula x 0.7 and selecting next higher standard scale.

For maximum scale value, multiply x 1.3 and select the next lowest standard.

If scale calculates to an exact listed value, use this value rather than the next higher or lower value.

Note: When ordering wattmeters and VArmeters, please specify CT ratio, VT ratio and required scale.

Specifications

Burden per element:	Current circuit: 2VA Voltage circuit: 1VA
Accuracy:	Class 1.0
Ambient range:	0° to +60°C, (32° to 140°F) standard calibration 20°C (68°F)
Ambient influence:	0.05% per 1°C maximum
Overloads-current:	10 x rating for 5 seconds., 1.2 x continuously
Voltage influence:	2 x rating for 5 seconds., 1.2 x continuously Accuracy maintained, 80-110% rated voltage
Power factor influence:	Accuracy maintained 0.1 lag to 0.1 lead
Enclosure code:	077: IP54 optional IP55 078: IP67 079: IP54 optional IP55
Response time:	077,078: approximately 2.5 seconds 079: approximately 3.5 seconds
Dielectric test:	Live parts to case including panel 2600V RMS for 1 minute

AC Wattmeter

AC VArmeter

• UL approved file no. E203000

** Specify CT (Current Transformer) and VT (Voltage Transformer) ratios if used, and preferred scale at time of ordering.

RTD Temperature Meter

RTD Temperature Meters*

Product Codes – Span Accuracy of 1.0%

Self-contained for 10 ohm copper or 100 ohm platinum RTD (Resistance Temperature Detector) - Specify copper or platinum at time of ordering.

Rating	Scaling*	4½" square flange	
		Standard case catalogue no.	Sealed case hi-shock catalogue no.
110/130V 50/60Hz	20-140°C	077-45RA-**QF-PQ	078-45RJ-**QF-PQ
110/130V 50/60Hz	0-150°C	077-45RA-**QE-PQ	078-45RJ-**QE-PQ
110/130V 50/60Hz	0-200°C	077-45RA-**QG-PQ	078-45RJ-**QG-PQ

For connection diagrams, see Fig. 17 on page 59.

Thermocouple Temperature Meters

Product Code – Span Accuracy of 1.0%

Meters are suitable for J and K type cold junction compensation and include thermocouple break indication. Specify J or K type and temperature at time of ordering.

Rating	4½" square flange standard case catalogue no.
110/130V 50/60Hz	077-45TA-**PM

For connection diagrams, see Fig. 18 on page 59.

Tap Position Indicator

Product Code

Indicator shows transformer tap, hoist or valve position a using 3-wire system for 1-18 tap positions with 400 ohm steps.

Rating	Scaling*	4½" square flange		8¾" square flange
		Standard case catalogue no.	Sealed case hi-shock catalogue no.	Standard case catalogue no.
110/220/240V 50/60Hz	1-18 taps	077-45P-	-	-

For connection diagrams, see Fig. 20 on page 60.

Select nearest higher rated voltmeter and specify requirement

- UL approved file no. E203000
- JT for J type, KT for K type thermocouple

* Other ranges available on request
- Consult with the factory.

** RI for 10 ohm copper or R2 for 100ohm platinum.

*** Specify input and scale.

Elapsed Time Meters

Product Codes – 99,999.99 hours, Non Reset. Burden 2.5VA.
50 or 60Hz

Synchronous motor running time meter with a non resettable indicator.

Rating	4½" square flange		8¾" square flange
	Standard case catalogue no.	Sealed case hi-shock catalogue no.	Standard case catalogue no.

AC Synchrocheck Relay and LED 360° Synchroscope

In the 0.77-14G and 0.77-14H models, the generator voltage is free to track the bus voltage (+ the voltage difference preset) over the input voltage range. In the 077-14L and 077-14D models, the generator voltage is to match the nominal input (bus) voltage specified (within the voltage difference preset)

LED Digital / Analogue Combination

Crompton model 077-DI features a combination of the traditional 250° 4½" switchboard indicator with the benefits of wide angle visibility plus trend indication. This rugged shock and vibration resistant taut band design provides precision accuracy and instantaneous reading via the bright in-dial mounted 3½" digit LED display.

Description

Model 077-DI digital analogue indicators are ideal for all applications where moving pointer instruments are preferable to indicate trend with the simultaneous display of a high visibility precision LED readout for increased user interface.

Packaged in a weather resistant case, the 077-DI is interchangeable with other analogue and digital instruments designed to directly mount in to a standard ANSI-C39. 4½" switchboard cut-out.

Available in side, center, or off-set zero versions, the 077-DI can accept AC current, voltage, frequency, watts, VAr and phase angle or DC current and voltage direct inputs as well as a wide range of transducer outputs, making it suitable for a variety of other applications including low-load current, temperature, speed, watt/VAr, percent and level.

Specifications

Inputs:	DC Voltage: 20mV-600V (1MΩ input impedance as standard) DC Current: 1mA-1A, 4 to 20mA (Voltage drop 200mV nominal). External shunt operation (50mV and 100mV). AC Voltage: 200mV-600V (1 kΩ / volt) AC Current: 1mA-999mA (Using internal shunt, voltage drop 200mV nominal). 1A, 2A, 5A and 10A using internal current transformer.
Common mode rejection:	=>80dB @ 50/60Hz
Overload:	Voltage: x 1.2 continuous. x1.5 for 10 seconds. Current using internal CT: x 1.2 continuous. x 10 for 10 seconds.
External power requirement:	Standard: 120 and 240V ±15%. Optional: 480V ±15% AC 40-60Hz
Burden:	3VA @ 60Hz
DC:	Standard: 12, 24, 48, 110 and 125V ±15%
Display analogue:	long-scale moving coil. 250° deflection. Scale length 6.8inches. Response time less than 2.5 seconds.
Display options:	Center or offset zero. Scale plate in colours other than white. Coloured lines or segments on scale. Slower response time.
Digital display:	3½ digit red LED. 7 segment (7.6mm, 0.3" high). Right hand decimal points. Polarity indication: positive / none. Negative / horizontal bar " - ". Update time (standard): 1 per second
Accuracy – analogue:	DC and AC ±1% of FSD (calibrated at 25°C)
Accuracy – digital:	DC: ±0.05% of reading ±1 count ±100ppm of reading / °C. (Maximum). AC current: 0-1 Amp ±0.1% reading ±3 counts ±150ppm of reading / °C. AC current: 0-10 amps ±0.1% reading ±10 counts ±150ppm of reading / °C (maximum) AC voltage: ±0.1% of reading ±3 counts ±150ppm of reading / °C. (maximum) Zero ±1 count ±0.2 counts/°C (maximum), DC offset scale only. Warm-up time: 1 minute
Long term stability:	±2 counts
Calibration check:	Recommended 12 monthly intervals
Enclosure code:	IP54 (optional IP55 using panel gasket)
Operational temperature:	0 to 60°C (32° to 140°F).
Storage temperature:	-20 to 60°C (-4° to 140°F)
Humidity:	Up to 90% relative @ 55°C. Tests to BS2011 part 2DA.
Isolation test voltage:	2kV RMS 60Hz for 1 minute
Interference rejection:	To IEEE STD472, ANSI C37 90A, SEN 361503, IEC 255-4
Approvals:	EMC and LVD UL approved file no. E203000

Features

- Rugged shock and vibration resistant taut band design
- High accuracy LED display
- Wide selection of AC and DC inputs
- Maximum trend indication visibility
- Input isolation
- External decimal point selection option
- Interchangeable with 4½" switchboard meters

Benefits

- Cost effective
- Meets all the requirements of ANSI-C39.1 (1981)
- IP54 (NEMA 3) protection.
- Optional IP55 (NEMA 4) gasket
- Bump, shock and vibration proof
- Customised options and features

Applications

- Switchgear
- Distribution systems
- Generator sets
- Control panels
- Energy management
- Building management
- Utility power monitoring
- Process control
- Motor control

Scale – Options

Options	Option code
1. Blank, uncalibrated dial (zero and full scale marks in pencil).	SA
2. Red or coloured line or mark (specify position).	SR
3. Coloured zones or segments (specify limits and colour(s)).	SZ
4. Non-standard caption (other than listed below).	SD
5. Black dial with white figures and pointer.	SB
6. Customer/user logo imprinted on dial.	SM
7. Finely divided scale.	-
8. Standard rating, single unlisted scale	-

Calibration – Options

Options	Option code
10. Zero-center scale. Not available for AC ammeters and voltmeters	-
11. Offset-zero scale wattmeters, VArmeters, DC ammeters and voltmeters.	-
12. Calibration to customer specification including special caption.	-
13. Calibration other than vertical, specify required angle from vertical.	CM
14. Non-listed ratings.	-
15. Temperature calibration, other than 23°C ambient.	CT
16. a) Calibration at 400Hz. b) Calibration to other specific frequencies between 25 and 500Hz.	C4
17. Potentiometer, externally mounted $\pm 10\%$ range adjustment.	-
18. Suppressed zero other than listed. DC only.	RA
19. Heavily damped movement.	PD

Construction – Options

Options	Option code
20. Anti-glare window.	BR
21. Internal illumination. Specify 6, 12, 24 or 36V DC	EL
22. *Neoprene™ polychloroprene panel basket.	MG
23. Red manual set pointer.	ER
25. Coloured bezel.	FA
26. Hermetically sealed case.	-

*Neoprene is a Trademark of E.I. DuPont de Nemours.

549 Series Panel Meters

Compact panel meters designed to fit standard 17/32" switch knock-outs. This range includes high accuracy AC and DC ammeters and voltmeters, elapsed time meters and impulse counters.

Specifications

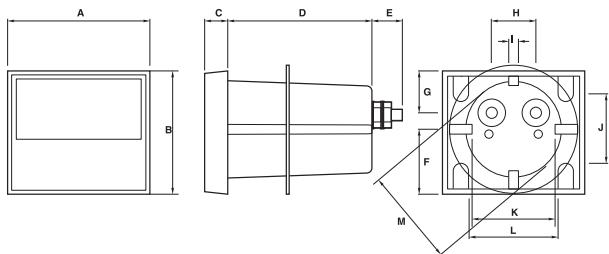

Enclosure code:	IP42 (IEC 529)
System frequencies:	AC Ammeters: 50, 60 or 400Hz AC Voltmeters: 50 or 60Hz Elapsed Time Meter: 50 or 60Hz
System voltage:	Elapsed Time Meter: 110/130V AC, 200/250V AC, 6 or 12V DC
Input ratings available:	AC Ammeter: 50mA-5A (self contained) extendible to 50A with external wound primary CT AC Voltmeter: 30-600V DC Ammeter: 100µA-20mA DC Voltmeter: 50mV-600V
Scale:	Angle: 90°. Length: 1 inch (26mm)
Operating temperature:	-10°C to 55°C (15 to 130°F).
Bezel window:	Toughened glass
Fixing on panel:	Simple clamp fixing
Approvals:	EMC and LVD, ABS (American Bureau of Shipping)

Dimensions

in.	1.2	0.57	0.25	1.09	015
mm	30.5	14.5	6.4	27.8	3.9

Features

Compact size
Fits standard 17/32 inch switch knock-outs
Toughened glass window
AC and DC ammeters and voltmeters available
"Hours run" and impulse counters available

Benefits

Simple clamp fixing
Easy installation on replacement
Panel space saving
Customised options and features

Applications

Switchgear
Distribution systems
Generator sets
Control panels
Energy management
Building management
Utility power monitoring
Process control
Motor control

Approvals

ABS (American Bureau of Shipping)
approved file no. 93-LD 17806-X

DC Voltmeter

Saxon Indicators

A range of 2½", 3½" and 4½" surface mount panel meters utilising pivot and jewel mechanisms and offering IP54 protection. The range includes iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters designed to perform in demanding environments.

Specifications – Elapsed Time Meter and Frequency Meter

Accuracy:	0.15 = 60Hz, 1.25 = 400Hz, 0.15 = 50Hz, 0.25 = 55Hz
Voltage:	110/130V, 200/250V
Frequency:	50Hz or 60Hz
Burden:	4VA Maximum

Specifications – Moving Iron AC Ammeter and Voltmeter

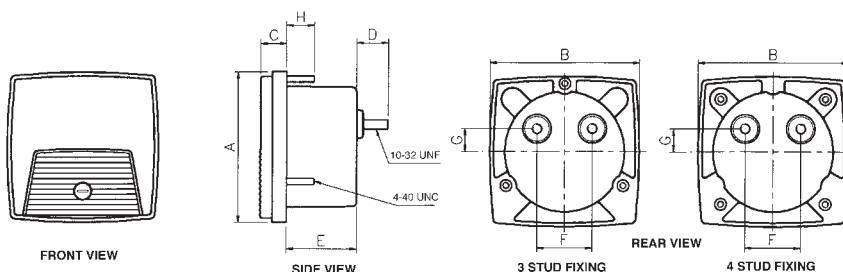

Accuracy:	±2%
Rating:	Ammeters: 1 - 30A Voltmeters: 10V - 600V
Overload:	Ammeters: x1.2 for 2 hours, x10 for 5 seconds Voltmeters: x1.2 for 2 hours, x2 for 5 seconds
Burden:	Ammeters: 0.5VA Voltmeters: 4.5VA maximum

Specifications – Moving Coil DC Ammeter and Voltmeter

Accuracy:	±2%
Rating:	Ammeters: 100µA - 30A Voltmeters: 50mV - 600V
Operating temp:	-20°C to 60°C (-4°F to 140°F)
Storage temp:	-30°C to 70°C (-22°F to 158°F)

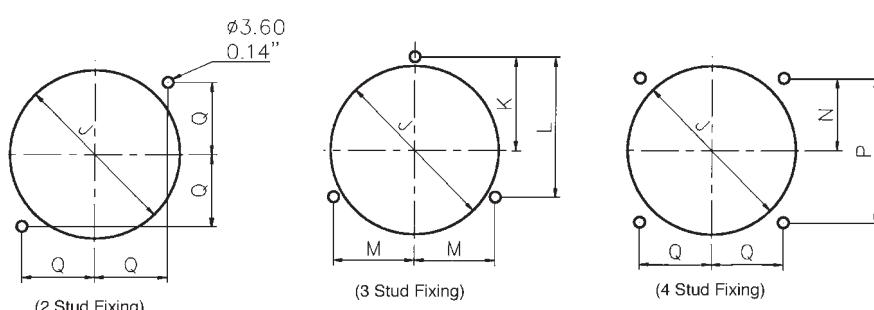

Dimensions

Specify number of fixing studs when ordering 2½" and 3½" meters. 4½" meters are supplied with 4 fixing studs.

016 Series Fiesta Indicators

A robust range of short-scale and long-scale 3½" surface mount panel meters offering IP55 protection and featuring a wide view contoured window. The Fiesta range includes iron vane and moving coil AC and DC ammeters and voltmeters, elapsed time and frequency meters and is ideally suited for demanding environments. Options include supplementary pointer, non-reflecting window, heavily damped movement panel gasket, clamp band fixing long-scale and coloured internal gasket.

Specifications – Elapsed Time Meter and Frequency Meter

Voltage:	100/125V, 200/250V or 480V AC
Frequency:	50Hz or 60Hz
Burden:	4VA maximum
Operating temperature:	-20°C to 65°C (-4°F to 149°F)
Storage temperature:	-30°C to 70°C (-22°F to 158°F)

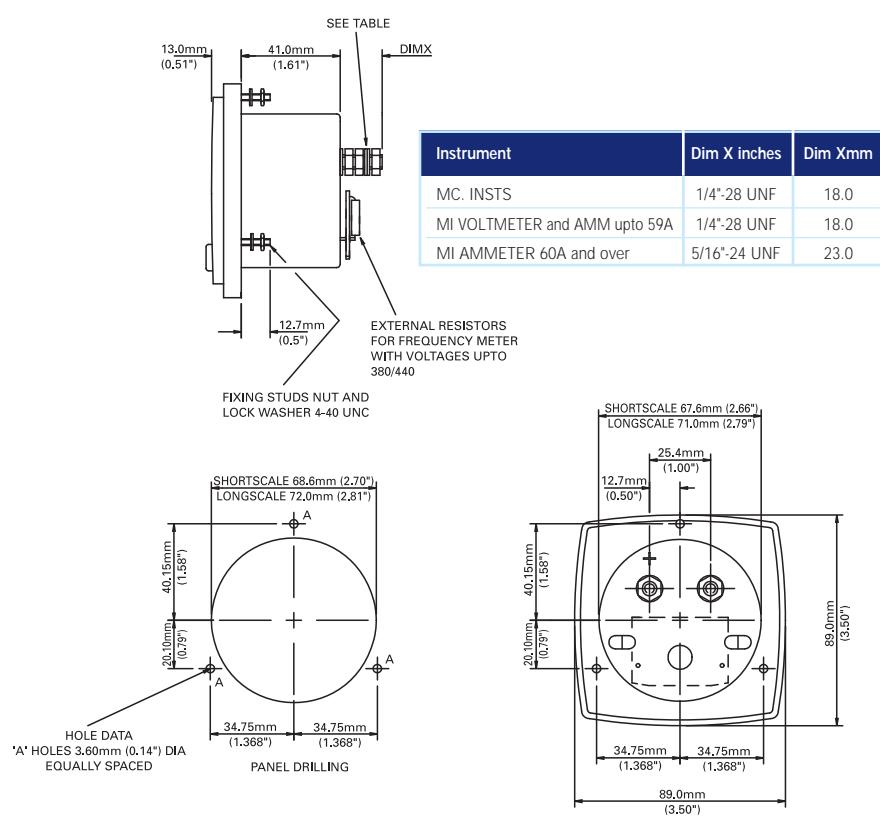

Specifications – Iron Vane AC Ammeter and Voltmeter

Accuracy:	Short-scale: ammeters 2.5%; long-scale: 1.5 %
Ratings:	Ammeters: short-scale 1 - 80A, long-scale 1 - 20A Voltmeters: 10V - 600V
Overload:	Ammeters: x1.2 for 2 hours, 10 x for 5 seconds Voltmeters: x1.2 for 2 hours, 2 x for 5 seconds
Burden:	Ammeters: short-scale 0.5VA; long-scale 1.5VA Voltmeters: 4.5VA maximum
Operating temperature:	-20°C to 65°C (-4°F to 149°F)
Storage temperature:	-30°C to 70°C (-22°F to 158°F)

Specifications – Moving Coil DC Ammeter and Voltmeter

Accuracy:	Short-scale 1.5; long-scale 1.5
Ratings:	Ammeters: 200µA to 30A, (100µA short-scale) Voltmeters: 50mV - 600V
Overload:	Ammeters: x1.2 for 2 hours, 10 x for 5 seconds Voltmeters: x1.2 for 2 hours, 2 x for 5 seconds
Impedance:	Voltmeters: 1000 ohms per nominal volt
Operating temperature:	-20°C to 65°C (-4°F to 149°F)
Storage temperature:	-30°C to 70°C (-22°F to 158°F)

Elapsed Time Meter

Challenger Series

The Challenger range of analogue panel meters offers accurate measurement and indication of most electrical and electronic parameters in industry standard $1\frac{1}{2}$ ", $2\frac{1}{2}$ ", $3\frac{1}{2}$ " and $4\frac{1}{2}$ " case sizes. This innovative design features a detachable lower fascia plate, which allows the flexibility of either surface or window mounting. The fascia is simply unclipped to achieve the completely flush panel appearance of rear of panel window mounting.

The range offers AC and DC ammeters, voltmeters and frequency meters utilising a high torque pivot and jewel movement. AC moving coil rectified meters provide 1.5% accuracy of the full scale value and feature a rear zero adjuster screw for tamperproof installation. AC moving iron meters also provide 1.5% high accuracy and true RMS measurement.

Operation

The Challenger series utilises a traditional pivot and jewel movement, incorporating specially hardened steel pivots and a spring loaded jewel. This robust mechanism is ideally suited for all applications, including the most demanding conditions.

Moving Coil Meters

These meters offer a centre cored, self-shielding moving coil movement using pivots, hairsprings and sprung jewels. Variations in movement are limited by design. All DC voltmeters are 1000 ohms per volt, moving coil rectified products run at 900 ohms per volt. Millivolt meters use a 5 millamps/50mV movement.

Moving Iron Meters

This clapper type repulsion design utilises a pivot, hairspring and jewel movement. The bottom jewel is oil filled to provide damping while the top is sprung for resilience. All voltmeters are manufactured with internal voltage dropper resistors.

Frequency Meters

Frequency meters utilise a 1mA/35ohm DC moving coil movement driven by an EMC hard frequency conversion circuit.

Dials, Pointers and Scales

Standard dials are matt white with black printed scales and a tubular knife-edge black matte pointer. The 90° scales are balanced within 1% of scale length and feature a highly repeatable flattened arc scale shape, ensuring consistently accurate measurement readings. Dials are interchangeable between the Challenger series for inputs within the published meter specifications of the meter. Options for non standard customised dials are available upon request.

Current Transformers and Shunts

Crompton Instruments, a Business Unit of Tyco Electronics, offers a comprehensive range of current transformers and shunts, for driving the Challenger panel meters for the safe and simple measurement of AC and DC currents.

Our extensive range of current transformers provides accurate measurement of AC current and ratio matching to a consistent 5 or 1 amp secondary current, proportional to the primary current.

Our range of shunts ensures a DC millivolt signal exactly proportional to the system current for driving ammeters, providing accurate measurement of DC current up to 12000A, with secondary inputs of, 50, 60, 75 or 100mV DC to match the Challenger input.

Features

Measurement and indication of AC amps, volts, frequency and DC signals

Surface or window mounting

Rear zero adjuster on moving coil meters

High torque pivot and jewel movement

True RMS measurement meters

AC and DC inputs

Up to 40A DC direct connected

Up to 50A AC direct connected

Benefits

AC moving iron and moving coil mechanisms

Reduced inventory

4 ANSI standard case sizes

Detachable lower fascia plate

Easy to modify for distributors

Through holes for back of panel mounting

Sealed and Ruggedised Indicators

078/080/087 Series 240° Scale

The Crompton Instruments 078/080/087 series of heavy duty sealed instruments are designed to comply with the most stringent industrial, marine and military specifications.

This metal cased range offers bezel sizes of 57mm, 83mm and 110mm all fitted with toughened glass. Indicators comply with Ministry of Defence specification DEF STAN 66.7, and operate efficiently in the most adverse environments where extreme conditions of shock, vibration, dirt, humidity and temperature variation are present.

Description

Indicators have metal cases with bezel sizes of 50 x 57mm (083), 83mm Ø (084) and 110mm x 100mm (078/087). All indicators are fitted with toughened glass windows. The standard black matte finish can be replaced with options ranging from light admiralty grey to BS3181C No:697. To prevent fogging, all indicators have been dried, evacuated and filled with dry nitrogen during manufacturing. The case interior retains a constant pressure of at least 94kPa above the exterior with leakage not above the equivalent of 1.33 Pa ml/s of air. Except on model 083, panel sealing gaskets are standard equipment.

Standard instrument dials are finished in acrylic white matte with black printing and a parallel pointer. Scales form a true arc with zero on the left hand-side. Options include dial illumination, a centre, off-set or suppressed zero, colour index lines, bands, zones or segments, a black dial with white printing, and customer logo.

Features

Designed specifically for stringent industrial, marine and military specifications

An extensive range of high accuracy measuring instruments in 3 case sizes

Rugged Hi-Q taut-band suspension

Bump, shock and vibration proof

Benefits

Complies with BS EN 60051 (IEC51)

IP67 (NEMA 6 and 6P) protection

Dial illumination option

Parallax error-free platform dials for 078/087. Optional for 083/084

Applications

* 100-440V = (100/125, 200/250, 380/440)

*** The T118 technical sheet is available on request.

** Using transformer box 855-954.

For specification and connection diagrams, please refer to equivalent models in the 240 Series DIN Panel Meter section. Replace 244 with 078 etc., e.g. 244-210 becomes 078-210.

Sealed and Ruggedised Indicators

080 Series 90° Scale

A range of metal case, sealed instruments for industrial and military applications involving extreme shock, vibration, temperature, dirt and humidity. Bezel sizes 32mm, 45mm, 57mm, 83mm comply with Ministry of Defence specification DEF STAN 66-7 or DEF STAN 66-9 for all standard ratings. Bezel size 89mm complies with MIL-M-10304 dimensions.

Description

Five bezel sizes of 32mm Ø (081), 45mm Ø (082), 57 x 57mm (083), 83mm Ø (084) and 89mm Ø (089) with barrel diameters of 26mm (081), 37mm (082), 53mm (083), and 67mm (084 and 089) and toughened glass windows are used throughout the series. To avoid fogging they are dried, evacuated and filled with dry nitrogen. Panel sealing gaskets are provided as standard with the exception of Model 083. The smaller cases on Models 081 and 082, are made from nickel-plated brass and anodised aluminium alloy. Single hole fixing is made with threaded clamp ring which screws onto the barrel, they also have ceramic insulated terminals and no zero adjuster is fitted. Models 083, 084 and 089 have steel cases with fixing holes in the flange. Sealed zero adjusters are provided. Standard instrument dials are finished in a white matte with black printing and parallel pointer. The scales form a true arc with zero on the left.

Options

Available options include dial illumination, a centre, off-set or suppressed zero, colour index lines, bands, zones or segments, a black dial with white printing and customer logo. Instruments operated by separate transducers indicate watts, VAr, frequency, phase angle, current, voltage and other physical/mechanical parameters are also available. Illumination options as follows:

Model 081: Through-dial, white or red bulb, 12 or 24V illumination.

Models 081/082: Betalite through-dial, 12 or 24V, illumination.

Models 082/083/084/089: Through-dial, red or clear LED, 12 or 24V illumination.

Models 083/084/089: Edge, white or red bulb, 12 or 24V, illumination.

Specifications

Performance:	BS EN60051 (IEC51) for models 081 to 084 DEF STAN 66-7 and 66.9 on request (081/084 and 089)
Accuracy:	Model 081: Class 5. Others: Class 2.5 Frequency meter 0.5% of mid frequency (083, 084, 089)
Scaling:	To BS89, BS3693 or DEF STAN 66-7 and 66-9 (081 to 084)
Dielectric test @ 50 Hz:	750V RMS (081); 1kV RMS (082); 2kV RMS (083/084/089); <50V 500V RMS All for 1 minute
Overloads:	x 1.2 rated current or voltage for 2 hours x 10 rated current for 5 seconds x 2 rated voltage for 5 seconds
Burden:	AC ammeter: 1VA maximum AC voltmeter: 3VA maximum Frequency meter: 4VA maximum Elapsed time meter: 2.5VA maximum
Enclosure code :	083/084/089: to IP67 (NEMA 6 and 6P) 081/082: to IP68
Case:	081/084 and 089: Black matte metal filled with dry nitrogen 081 and 082: Nickel-plated brass and anodised aluminium alloy.
Bezel:	Black matte metal
Bezel window:	Toughened glass
Operating temp.:	Model 081 to 084: -40°C to +70°C (-45°F to +158°F) Model 089: -55°C to 65°C (-67°F to +185°F)
Standard calibration:	23°C (73°F)
Approvals:	EMC and LVD. DEF 66.7 and 66.9

Glossary

Glossary of Terms

MI	Moving iron, also called 'iron vane' in the North American market for measuring AC amps and volts.
MC	Moving coil for measuring DC amps and volts.
Taut band suspension movement	A meter movement held under tension, usually on a ligament.
Ligament	The taut band.
Pivot and jewell (P&J)	A movement which rotates on a spindle, and pivots within an oil filled jewel. This type of movement typically offers excellent vibration resistance characteristics.
Short-scale	Angle of deflection for a movement is usually 90 degrees but ANSI is 100 degrees in some products.
Long-scale	Angle of deflection for a movement is usually 240 degrees but is frequently referred to as 270 degree.
FSD	Full scale deflection.
ES	End scale.
Input	Electrical value from which the measurement is derived to achieve the full scale deflection of the movement.
Linear	A term used to state that the input is constant, allowing for an even scaling.
Non linear	The opposite of linear, giving a scale shape which will cramp at some point on the dial. Usually inaccurate below 20% of the full-scale value.
Logarithmic scaling	A log scale usually derived from a non linear DC output.
Scale	The graphical representation of the value being measured.
Dual arc	More than one set of figures on a dial plate.
Dial plate/scale plate	Surface on which the dial is drawn.
Calibration chart	A chart matching input values to scale mark, mainly used for complicated scales.
Enclosure rating	Usually expressed in the form of IP rating or as NEMA in America. This states the product, resistance to the ingress of moisture and dust.
DIN	European standard meter shape. It is based on multiples of 24mm, i.e. 48, 72, 96, 144 mm.
ANSI	American National Instrument Standard.
JIS	Japanese Instrument Standard.
BS89	Old British Standard usually refers to rectangular meter or "Fiesta" style products.
Switchboard meter	General term for long-scale instruments.
Panel meter	General name for short-scale instruments.
Analogue indicator	Generic term for instruments usually refers to a low accuracy meter. An indicator only.
